

Specification Amendments

Please replace the paragraph of the specification on page 5, beginning on line 8, with the following:

An exemplary client viewer 20 is a conventional, off-the-shelf Internet Web browser, having features and functions such as are common to popular Web browsers. Client viewer 20 is not limited to any particular type of Web browser. For instance, client viewer 20 might be the ~~Internet Explorer~~ INTERNET EXPLORER®-brand browser available from Microsoft Corporation of Redmond, Washington, or a ~~Netscape Navigator~~ NETSCAPE NAVIGATOR®-brand browser, available from Netscape of Mountain View, California. Each of these browsers supports a different feature set, and responds to different commands and command sets. In addition, the term "client viewer" as used herein encompasses any software that is used by a client to interpret data obtained from server system 12. In the future, such software will likely comprise a variety of downloadable components and helper applications used by software other than traditional browsers to render multimedia content from the Internet or other servers.

Please replace the paragraph of the specification on page 7, beginning on line 10, with the following:

A number of program modules may be stored on the hard disk 144, magnetic disk 148, optical disk 152, ROM 138, or RAM 140, including an operating system 158 (~~e.g., the server operating system 22 below~~), one or more application programs 160 (~~e.g., application(s) 30, Internet Information Server 24 below~~), other program modules 162 (~~e.g., platform 26 below~~), and program data 164. A user may enter commands and information into computer 130 through

1 input devices such as a keyboard 166 and a pointing device 168. Other input
2 devices (not shown) may include a microphone, joystick, game pad, satellite dish,
3 scanner, or the like. These and other input devices are connected to the processing
4 unit 132 through an interface 170 that is coupled to the bus 136. A monitor 172 or
5 other type of display device is also connected to the bus 136 via an interface, such
6 as a video adapter 174. In addition to the monitor, personal computers typically
7 include other peripheral output devices (not shown) such as speakers and printers.
